

## Finance

**Sao Paulo dehydrates; the city/state suffers because of a water crisis. What finance funds may be available?**

### Objective

Members of the LinkedIn discussion group '**Sao Paulo is running out of water**', come from all over the world. They all have large networks and want specialized people in their network to get involved in order to get more knowledge, power and world wide support and tackle this world issue of increasing dehydration.

**Katharina Braig**  
(Swiss)

### Financial Call for Projects (EU)

Still looking for an investor for your (early-stage) sustainable infrastructure project? Here is the link to the Call for Projects for the next 5th GIB Summit (27-28 May 2015): <http://www.gib-foundation.org/call-infrastructure-projects/>.

**Sergio Correa de Jesus**  
MFA

Let's think of a sensible and feasible strategy amongst us. Seems like naturally people are already revealing their expertise and areas of interest so perhaps there is a chance for some kind of formal proposal at the end that could be delivered to the

- World Bank
- Rockefeller Foundation
- United Nations Sustainable Development Fund
- and others ( mayors! )

Mayors are increasingly seen as having immense relevance in world matters, understandably so! They can be catalysts for political and environmental change. They are the best equipped with arguments

- for seed money to formulate a proposal to the most affected cities, not just São Paulo
